

# Subheadings of the Harmonized System Nomenclature

A Heading may further be sub-divided into two or more subheadings.

Subheadings provide more details on the articles in the Headings.

Some Headings are sub-divided into Subheadings

Headings not Subdivided >> Two zeroes are added after the four-digit codes.

Subheadings use a dash system to show sub-division

A one dash subheading is shown as five-digit numerical codes. One Dash Subheadings are generated by adding one digit to the heading Code.

The One Dash subheadings could be subdivided into 2 Dash Subheadings

The 2 Dash Subheading Codes are generated by adding one digit to the 1 Dash Subheading Code.

More digits are often used at national or regional level

The EAC has subdivided some of the 2 Dash Subheadings to 3 Dash Subheadings.

The EAC has subdivided some of 3 Dash Subheadings to 4 Dash.

The EAC has done that to Highlight some products

Identification of duty rates is done at the eight-digit code numbers in the case of the CET.
